

Mastering Countdown Timers: Implementing Pause/Start Functionality in JavaFX

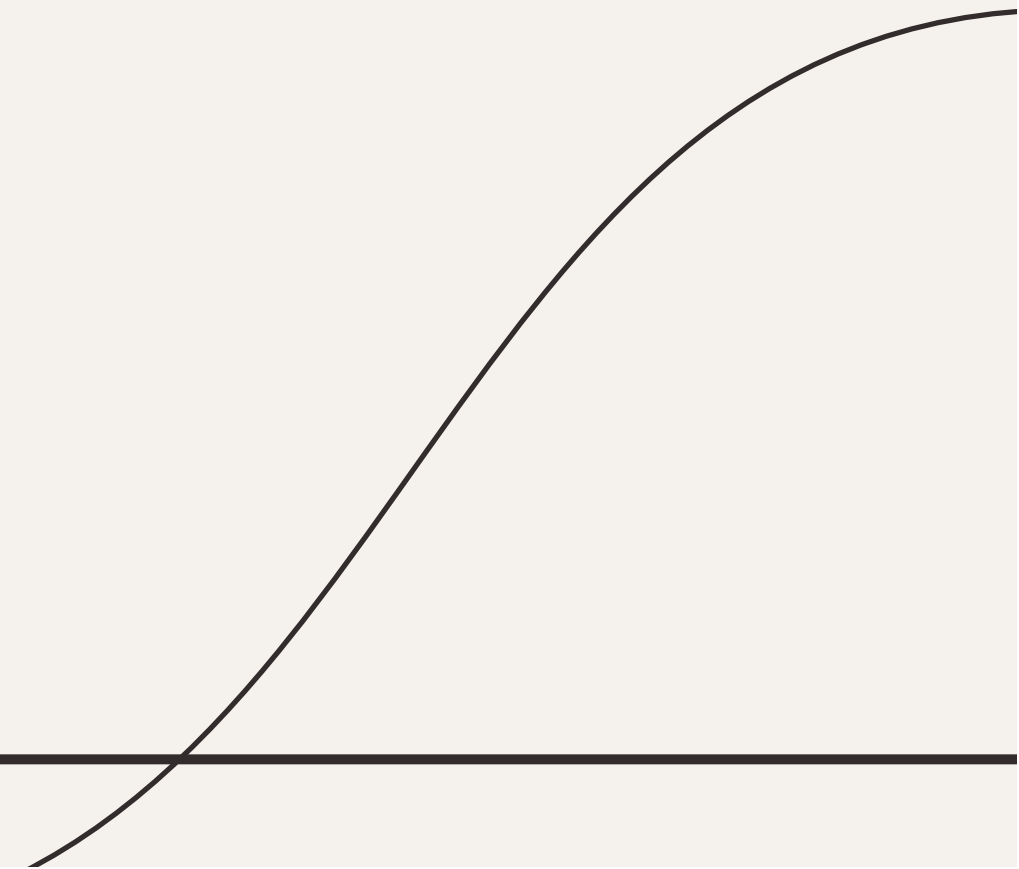

Introduction to Countdown Timers

A JavaFX-based Countdown Timer that allows users to input time, view a countdown, and control it with pause/resume functionality.

Key Features

1. User Input Options
2. Real-Time Countdown
3. Pause and Resume
4. Error Handling
5. Completion Notification

Implementing a **pause functionality** is crucial for user control. We will discuss how to pause and resume the countdown timer effectively, ensuring that the state of the timer is preserved and can be resumed seamlessly.

Instructor Guidance:

Special thanks to Sir Sheeraz Iqbal for mentorship and valuable insights.

Thanks!
